Alan Scott	37

### **C Class**

Joe Dawson	27
------------	----

Thank you very much to all who helped or assisted with this event.

Full report to follow

# Charity Trial : Boxing Day 2008

I apologise for the extreme lateness of this short report, but I was waiting until I had more information on the Charity and had actually passed on the money.

This is an annual event, going back to the 80's. Each year the Committee decide on a Charity that the money will be donated to, there is usually a connection with Club or Committee member. Over the years we have donated to various Charities.

The Club always pay for the permit, the insurances, gift for Landowner and any catering that is on offer.

This year we raised £220 which the Club made up to £250, this was presented to **GRAND BOYS TRUST** who raise funds for **PKU Research** Yorkhill Hospital.

**PKU Phenylketonuria** is an autosomal recessive genetic disorder characterized by a deficiency in the enzyme phenylalanine hydroxylase (PAH) This enzyme is necessary to metabolize the amino acid phenylalanine to the amino acid tyrosine.

Left untreated, this condition can cause problems with brain development, leading to mental retardation and seizures. However PKU is one of the few genetic diseases that can be controlled by diet. There is no cure. Damage done is irreversible, so early detection is crucial.

If you would like to find out more, look up Phenylketonuria on wikipedia

THE GRAND BOYS : Scots / Irish Folk, Country & Rock n' Roll

I would like to thank all Lanarkshire members for their kindness on Boxing Day, many of you gave me more than the required entry fee, some bought calendars,  
THANK YOU
